

# VAN TOURER

THE NEW VANTOURER 2021

COMPARABLY BETTER

THE HOLIDAY

OF YOUR DREAMS

GOOD JUST KEEPS

GETTING BETTER!

## THE NEW VANTOURER 2021 IS HERE.

Where listening and skill meet, a van is created that not only surprises, but convinces. A van with an innovative bathroom concept that adapts flexibly to your needs. A van with a completely redesigned pop-up roof that offers breathtaking panoramic views and supports the aerodynamics of the entire vehicle. A van with an optional fold-down bed in all four layouts and an innovative storage space concept in series.

The result is not just a van, but a VANTourer. Whether for holidays or everyday life, beach or city – the new VANTourer is universally applicable. All four layouts offer maximum comfort and practical compactness for every taste. Perfectly complementable useful options.

**Don't just drive, drive better – welcome to the new VANTourer 2021.**

### VANTOURER 540 D

- + short, manoeuvrable, an everyday hero and holiday companion
- + transverse bed in a length of 5.41 m
- + energy-efficient compressor refrigerator (80 l)
- + Truma diesel central heating

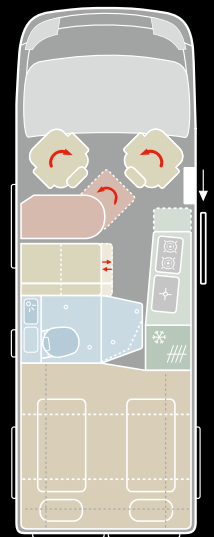

### VANTOURER 600 D

- + the classic family layout
- + comfortable and redefined for modern life
- + transverse bed in a length of 5.99 m
- + eye-level refrigerator (95 l)
- + Truma diesel central heating

### VANTOURER 600 L

- + with two comfortable single beds for the sporty couple
- + single beds in a length of 5.99 m
- + energy-efficient compressor refrigerator (80 l)
- + Truma diesel central heating

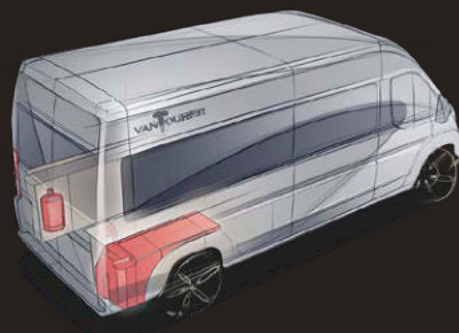

### VANTOURER 630 L

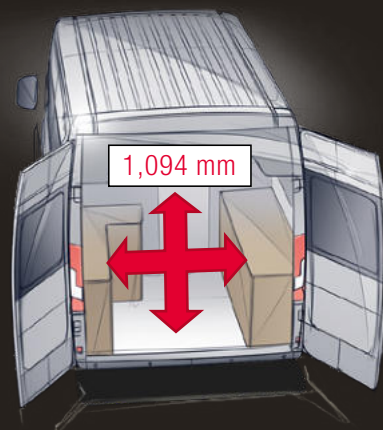

- + the Liner-VANTourer with lots of living and storage space
- + single beds in a vehicle length of 6.36 m
- + eye-level refrigerator (95 l)
- + Truma diesel central heating

# UP TO 40 %

## MORE REAR STORAGE SPACE

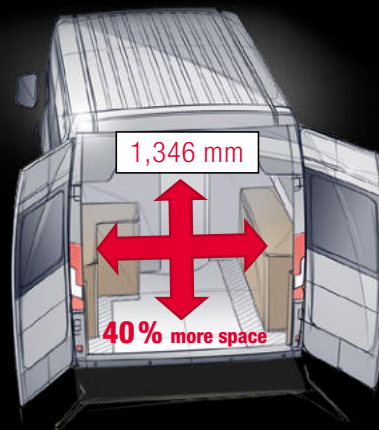

Was everything better in the good old days? Not at all! The gas cylinder and water tank used to take up so much space that it was nigh-on impossible to take anything bulky with you.

The large lateral rear storage boxes used to jut far out into the loading area, meaning there was little space available for loading. What a waste of space!

The VANTourer has the solution: the fresh water tank can now be found underneath the vehicle. Thanks to the compact TRUMA central heating system, you now only need to take a 3 kg (instead of 11 kg) gas cylinder with you, which is only used for cooking.

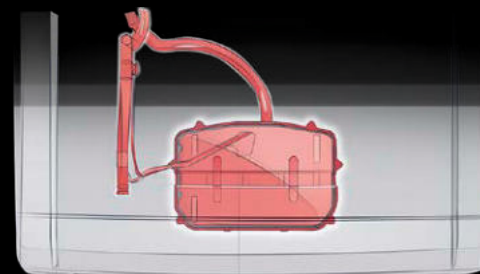

With the new, expanded design concept, the storage boxes are significantly narrower and, depending on the layout, the rear loading area is up to 40 % bigger. Even bicycles can fit in the VANTourer diagonally.

## UNDERFLOOR FRESH WATER TANK

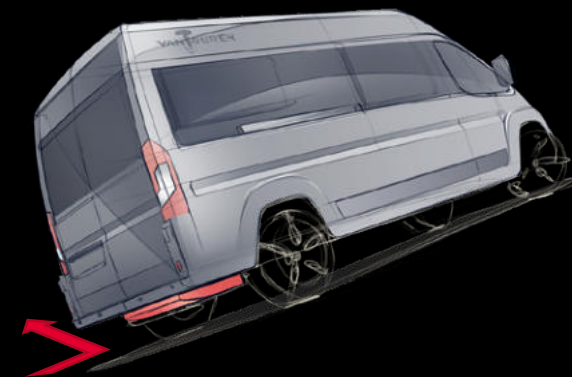

Yes, you read that right: the fresh water tank is now situated under the vehicle. Not only does this save space, it also gives the already very manoeuvrable VANTourer an extra helping of stability when driving.

The 105 litre fresh water tank is protected from the environment by a special coating and can be heated for journeys during cold weather. Naturally, the same goes for the covered pipes which run under the vehicle.

In addition, the fresh water tank is bevelled at the back so that it won't touch the ground when manoeuvring on slopes.

The fresh water tank is heated.

The bevelled tank means the bottom of the vehicle won't touch the ground.

Low centre of gravity for more stability when driving.

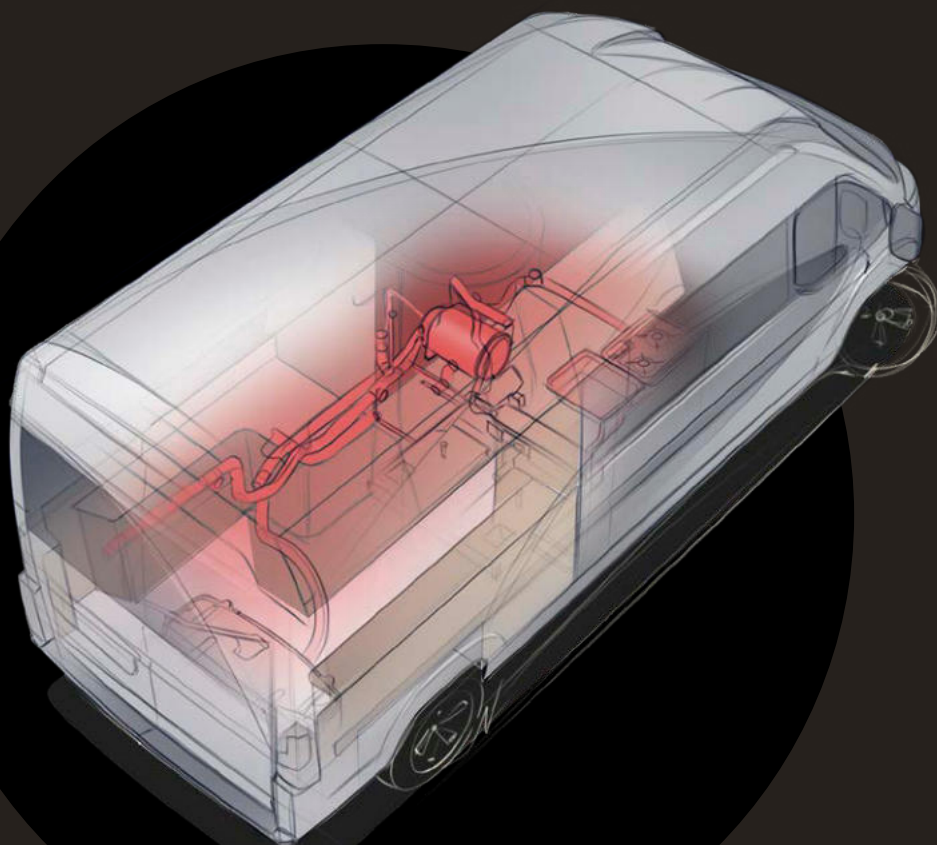

# THE HEATING SYSTEM

## THAT CREATES STORAGE SPACE

A real storage saver and foot warmer – in addition to the larger storage space, the TRUMA central heating system offers another advantage – independence.

No need to worry about getting your hands on a new gas cylinder, no installing unwieldy 11 kg giants. Drive with the knowledge that you can top up your TRUMA diesel heating at any filling station at any time of the day or night. In addition, the very quiet heating system is situated centrally where the heat is needed, under the dining area in the living space. Warm air vents in the living, sleeping and rear areas deliver the heat to exactly where it is needed.

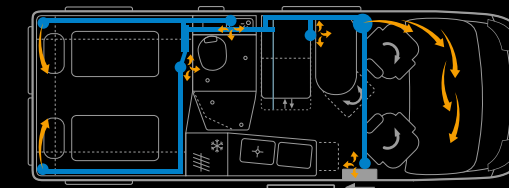

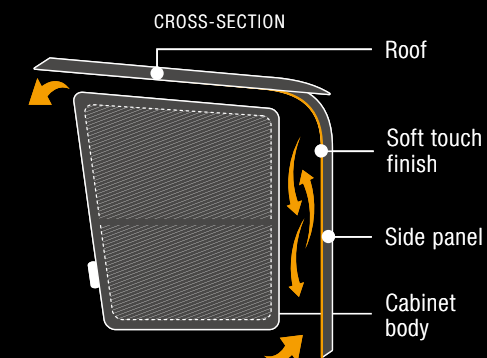

## HOT AIR CIRCULATION

Unlike many competing models, the cabinets in the VANTourer are fully back-ventilated thanks to the sophisticated design. As a result, no condensation can form and clothes inside the wardrobes do not get damp, even in extreme outside temperatures.

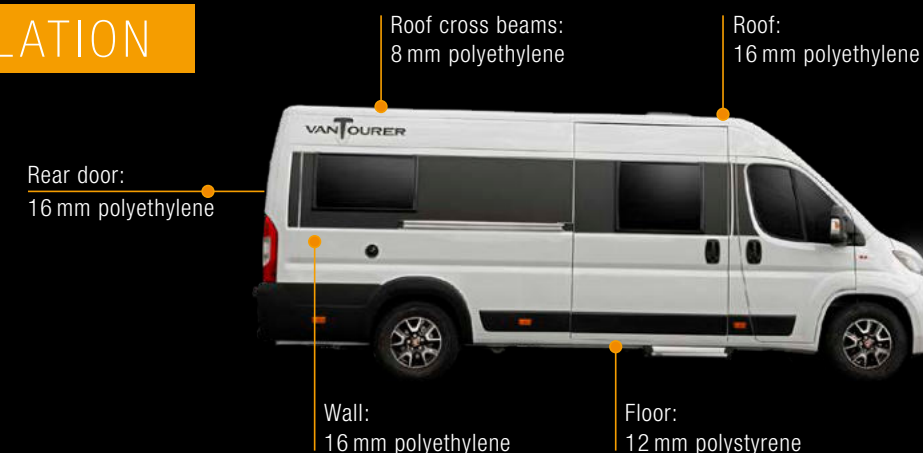

### WE GUARANTEE:

1. No penetration of unwanted odours
2. No penetration of condensation
3. No mould formation

Due to the additional air vent behind the driver's seat, the cab is optimally heated, not just while driving.

## BEST INSULATION

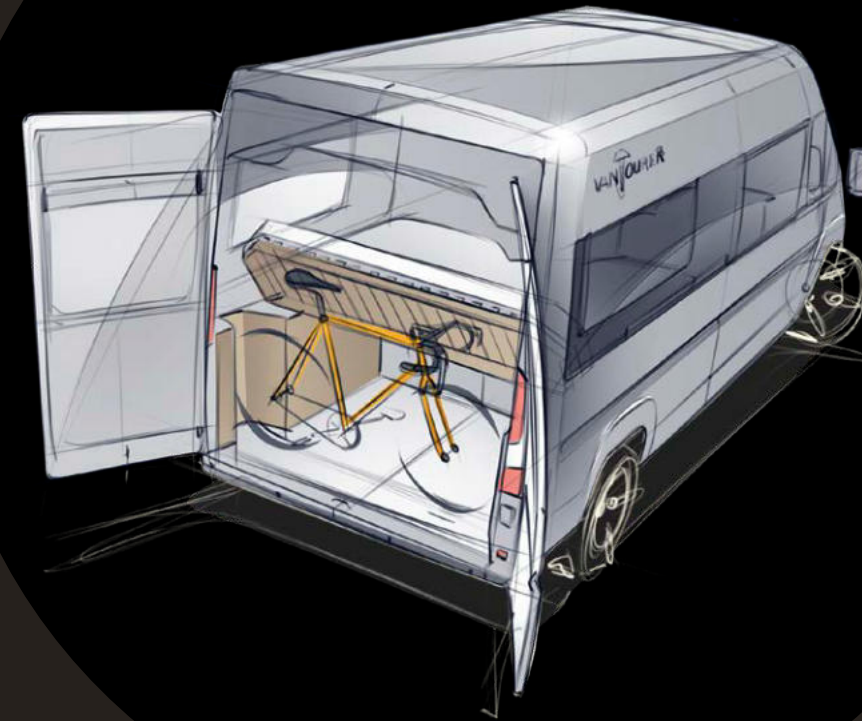

Enjoy optimal temperatures when on the road: Cold bridge optimized insulation guarantees superior climate control wherever you are. The particular strengths of the breathable, fabric-covered side panels and the materials used in the ceiling and the floor area lie in their impressive insulation and water absorption properties. Everything remains dry – in contrast to many competing vehicles, in which the side panels are made of plastic. This is why the VANTourer models are considered to be among the best-insulated vans in the industry.

# SMART

## REAR STORAGE CONCEPT

Van experts know that bikes are stored on the bike rack, but if it rains when you're driving, mud splashes up and without a protective cover the bike is completely filthy, with the subsequent first rays of sun, setting off on a bike ride is difficult and fixing the bikes to the rack on the rear door is annoying. Then there's the thought of bicycle thieves, which can bring restless nights when the bike has to be kept outside. With the new VANTourer, you can get one over on both the weather and the thieves and easily store up to two bikes in the vehicle, depending on the layout.

Even in everyday life, the new large rear storage space offers plenty of room for moving boxes or other bulky everyday objects – truly a genuine all-rounder.

Those familiar with VANTourers will have noticed: On the left you can see the variants with fold-down beds – but what about layouts with single beds? This design has also been improved. A fold-down bed is now also optionally available, so that not only can you sleep comfortably in the 600 L and 630 L, you can easily reconfigure.

Only one handgrip is needed to fold one of the bed sections upward – leaving space for a bike at the rear. You can find more configuration options on the following pages - for example, how you can convert the bed into a comfortable couch.

You can find more technical specifications and videos at [www.vantourer.de](http://www.vantourer.de)

# THE NEW VANTOURER

STRESS-FREE TRAVEL MEANS **BETTER-QUALITY SLEEP**

## MOBILE COMFORT

Come in and be inspired from the outset by the bright and appealing interior. You'll be amazed by the spacious, airy interior – despite the compact exterior dimensions that make it so manoeuvrable on winding country roads as well as twisting streets.

Sit down and make yourself comfortable, whether you're on the front seats, which can be quickly turned round for a friendly get-together, or the comfortable bench, equipped with a breathable and easy-to-maintain fabric artificial leather combination.

**1 These seats are very comfortable**, durable and made to a very high quality. Enjoy automotive comfort with fleece-reinforced upholstery on the front seats as well as the bench, which from this model year on will contribute even more to the inviting atmosphere of the VANTourer with a new upholstery. The bench in the dining area can be easily pushed apart without any time-consuming conversion of the headrests and thus provides even more seating options – even a child seat can be easily attached. The headrests are individually adjustable.

540 D/600 L

Prepare to be impressed by stylish design with a two-tone appearance which runs through the entire vehicle, as well as many other ingenious details. For example, the large table with a swivelling extension. When retracted, it's easy to get from the cockpit to the rear and when extended, it becomes a really generous table.

With regard to the wall unit design, the furniture covers are flush-mounted so that the wardrobe forms an elegant, shapely frontage. All covers and drawers are equipped with high-quality metal handles with safety locks and robust metal hinges.

Thanks to the closed design, the large cabinets with height-adjustable shelves are fully back-ventilated. Moisture exchange takes place behind the wardrobe – meaning laundry stays dry.

1

High-quality and innovative: This is not the only initial impression you get when you step into the new VANTourer. Nowhere do you see screwed joints – this is high-quality furniture construction. Unprotected sharp edges? No way! Also, where the furniture has been glued, neither formaldehyde or any other noxious substance has been used. The furniture is made using 13 mm thick wood (instead of the usual 10 mm). All VANTourer windows are fitted with additional security systems as standard. Experience it for yourself – everything here is a well-rounded package.

**1 The curved lines of the** wall units not only look good, but also enclose more storage space than with conventional motor homes.

**2 Without a tangle of cables,** your extra-large TV can be placed in the TV compartment between the wall unit and the bathroom wall – a cable duct ensures a tidy connection.

2

3

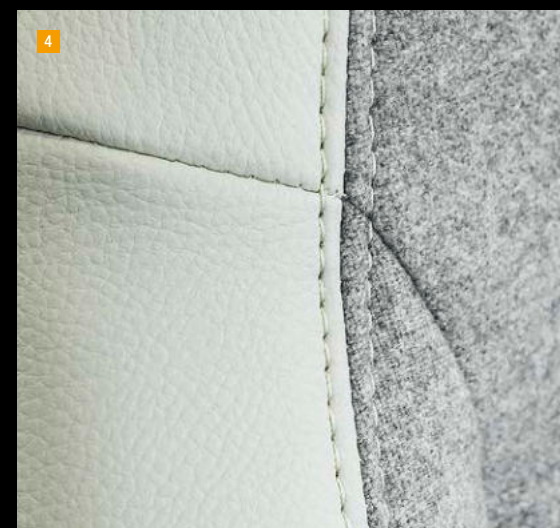

**3 The dimmable, energy-efficient LED ambient lighting** below the wall units creates a particularly cosy atmosphere in the living area. Just the right light to help you unwind at the end of the day.

**4 Details make all the difference.** The new two-tone upholstery now looks even more sophisticated. The additional fleece layer improves comfort when sitting, even on longer journeys – perfectly balanced, not too hard, not too soft.

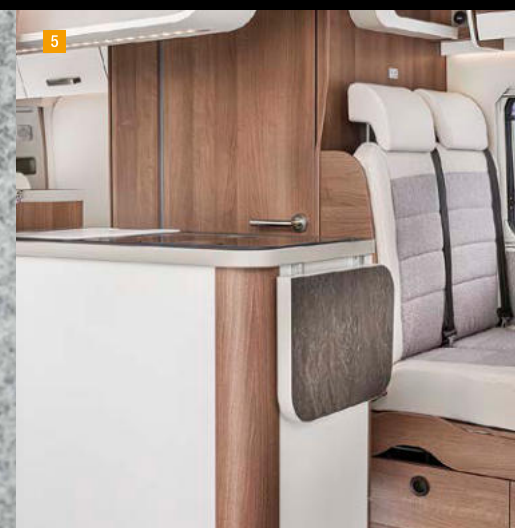

**5 First impressions count:** A kitchen splashback just cannot look any more expensive.

**6 Ample storage space.** There is space for everything – even for slightly bulkier water bottles.

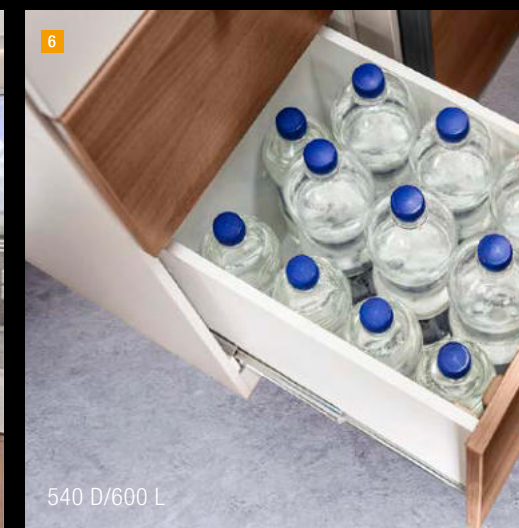

**7 Easy to use:** Above the sliding door is the new VEHICLE CONTROL SYSTEM – a central console for controlling the on-board technology.

## COOKING WORLDS TO ENJOY FOOD

Your shopping basket full of local delicacies. Fresh from the market, you enter the kitchen and your cooking enjoyment begins. Whether you're an amateur or a gourmet chef – here, functionality makes cooking a joy. In the VANTourer, you'll find everything you need in the right place to prepare meals on your trip.

There's plenty of kitchen storage space: The raised 95 litre refrigerator in the 600 D and 630 L stores holiday delicacies. The space-saving version with 80 litres in the 540 D and 600 L leaves more room for preparation. The kitchen drawers with stable, roller-mounted full extension runners and soft-close as well as the wall units with height-adjustable shelves keep all the utensils from plate to pot ready for you. Drawer and door edges are covered with thick, durable plastic. The area between the worktop and kitchen wall is sealed, so no splashes get behind the wall cladding. Here too, quality is important.

- 1 The sink cover** that can be used as a cutting board (540 D and 600 L).
- 2 The modern, backlit Perspex storage compartment** offers space for spices, etc., and gives the kitchen a modern touch - even when seen from outside through the sliding door.
- 3 Even when it gets bumpy**, the spacious cutlery drawer keeps everything in its place.
- 4 The state-of-the-art gas cooker** with piezo igniter heats the prepared food quick as a flash.
- 5 Quiet and economical**, the compressor refrigerator runs at only 12V to keep your food fresh.

600 L

600 L

## SLEEPING SPACE FOR SWEET DREAMS

The bedroom offers maximum comfort and it is the perfect place to sleep, read, dream and to unwind. The breathable fabric wall covering prevents annoying condensation. The slanted and deep-drawn wall units provide headroom and offer plenty of space.

**1 Optimal use of space:** there's even room under the steps for those holiday essentials (600 L and 630 L).

**2 Plenty of space:** There is an additional storage space next to the steps to the bed (600 L and 630 L).

What's wrong with spending the day in bed? Nothing, really. After all, you are on holiday and this bedroom is even more cosy than the one at home. It also offers some magnificent views. Make yourself comfortable and let your thoughts roam free and enjoy the panoramic views of the surrounding landscape from the front window.

Alternatively, you can grab a good book and relax while reading. Dimmable, energy-efficient LED lighting strips provide a pleasant atmosphere. Reading lights provide additional lit areas for leafing through a book.

**1 No giants** – except for the giant space under the bed in the shape of a pull-out drawer, for example.

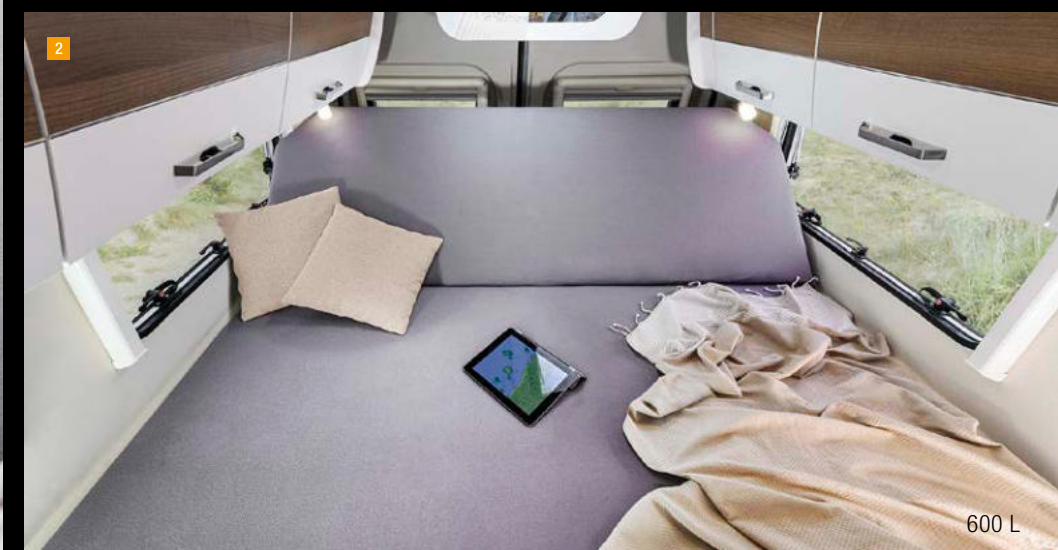

Flexibility is the keyword - because who wants to just stick to living and sleeping when the living area is so wonderfully flexible? With a few simple steps, you can turn your bed into a comfortable couch and watch a good film, or open the rear doors wide and enjoy your surroundings – even when it's raining.

- 1 In the spacious sleeping area it is also possible to spend the night comfortably for two. The even more comfortable Evopore HRC mattresses with innovative WaterGEL overlay are available as an option.
- 2 Raise the headboard and cast your eye over your VANTourer.

- 3 Fold the footrest back and enjoy the view through the VANTourer's open doors.

VANTOURER 2021

## THE ALL-ROUNDER WITH FOLD-DOWN BED

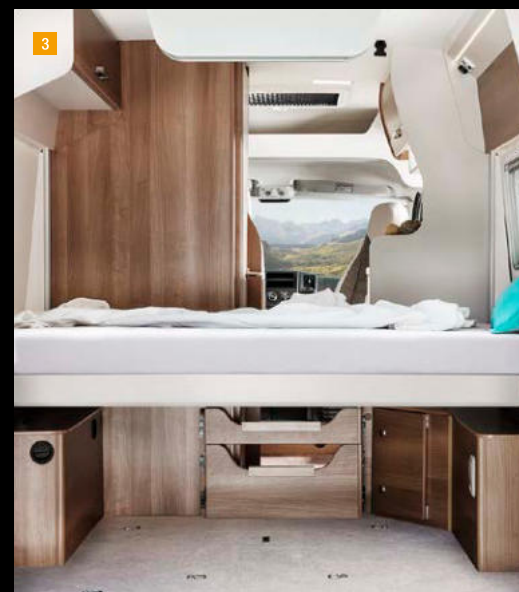

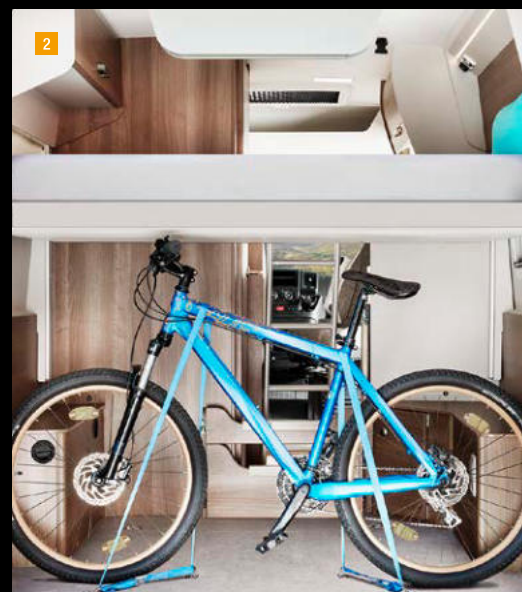

Do you need a bit more space? In the rear of the VANTourer there's not only room – but freedom. All four layouts can be optionally equipped with an infinitely adjustable fold-down bed.

While traditional fold-down beds that you see in significantly more expensive motorhomes, disappear completely under the ceiling and cannot then be used for sleeping, the sleeping area in a VANTourer is fully usable (depending on the position), while valuable holiday essentials, e.g. your expensive bike, can be safely and cleanly stowed away, giving customers peace of mind. Thanks to the standard preparation, the practical fold-down bed can also be retrofitted at any time.

**1 Travelling as a party of four?** No problem. Simply lift the drop-down bed to its highest position and you instantly create space for a double bed underneath (option).

**2 Still room left:** It offers plenty of space, even when lowered to the middle position.

**3 When in the bottom position,** it's as comfortable to sleep in as your own bed at home.

VANTOURER 2021

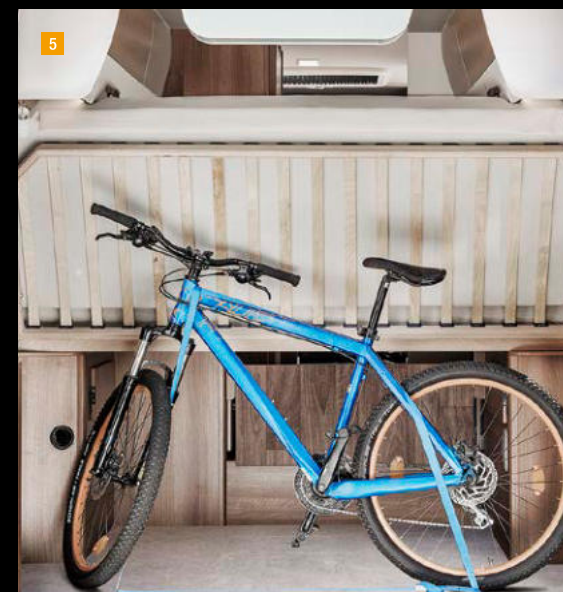

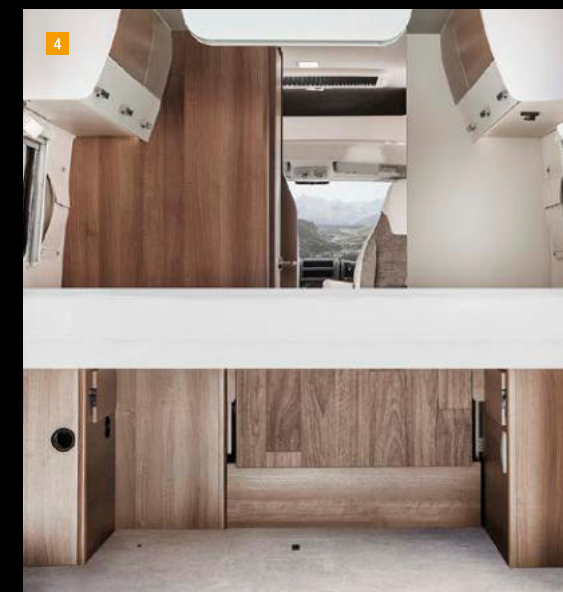

## PLENTY OF SPACE AT THE REAR

It's always the case – you always take too much on holiday. For that reason it's important that your storage space is as flexible as possible.

The VANTourer offers – in comparison with many competitors – a flexible bed that can easily be folded upwards at two ends, creating lots of free space.

**4 Whether you are alone or a couple** – the sleeping area offers plenty of space.

**5 Do you need more storage?** No problem. Just fold the foot- or headrest upwards and use the resulting space however you need.

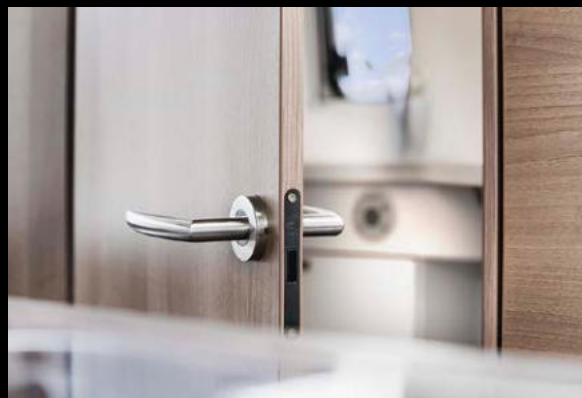

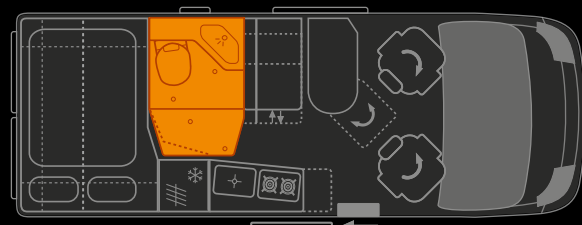

In the new vario bathroom there is not only more space for your relaxing shower, the washbasin has also increased in size considerably. The toilet window allows water vapour to escape quickly and, in conjunction with the pull-out tap, also allows a refreshing outdoor shower.

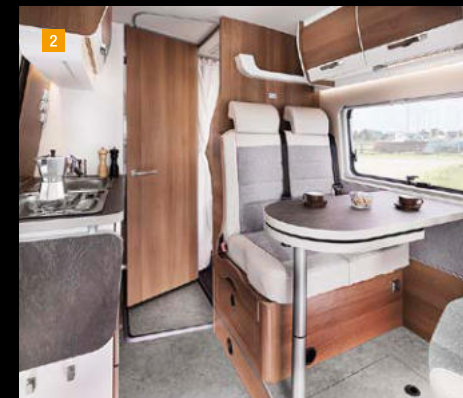

## THE NEW VARIO BATHROOM ...

The VANTourer 2021 impresses with the new vario bathroom, which is now integrated as standard in all four models. Why should you decide when you can have everything?

The flexible combination of compact separate bathroom and spacious en-suite bathroom leaves you free to choose – space-saving bathroom with extra large washbasin or simply converted, an en-suite bathroom with lots of space for the great showering pleasure.

## ...WE KNOW EVERY TRICK IN THE BOOK

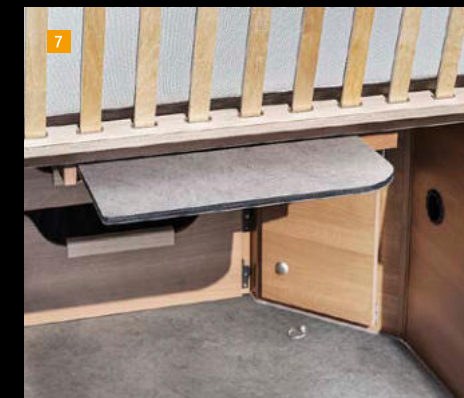

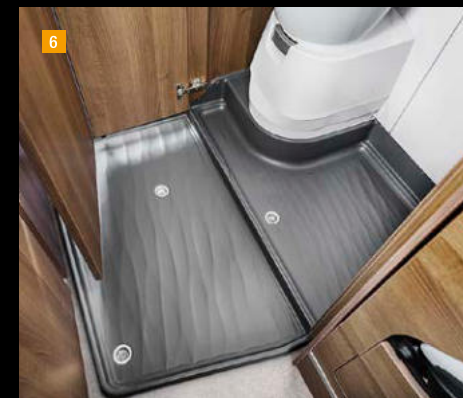

**1** In "normal" mode you can easily walk back and forth between rear and cockpit and **2** use the toilet and the larger sink as in the usual compact bathroom. An insert in the additional shower tray improves the look and feel.

**3** The shower tray insert is removed with a simple hand movement, **4** the angled shower wall is swung forward and **5** a shower curtain is pulled around – everything is ready for your showering pleasure in the bathroom.

**6** Once you have removed the shower tray insert, the extended shower tray offers plenty of space for extensive showering pleasure.

**7** You can stow the shower tray insert in a perfectly fitting compartment under the bed with a flick of the wrist – and the way is clear for a refreshing shower.

# VANTOURER FOR 4

## THE INNOVATIVE POP-UP ROOF

Sleep like kings – thanks to the new pop-up roof this is now your routine. With it, two more people will find a cozy sleeping place with a special view.

The innovative pop-up roof, manufactured using unique LFI technology, offers optimum insulation values compared to conventional GRP constructions, and maximum stability, as the entire roof is manufactured as a complete part. During development, great importance was also attached to a particularly aerodynamic shape of the pop-up roof in order to guarantee optimum driving characteristics. The lines of the frame were harmoniously extended into the rear area.

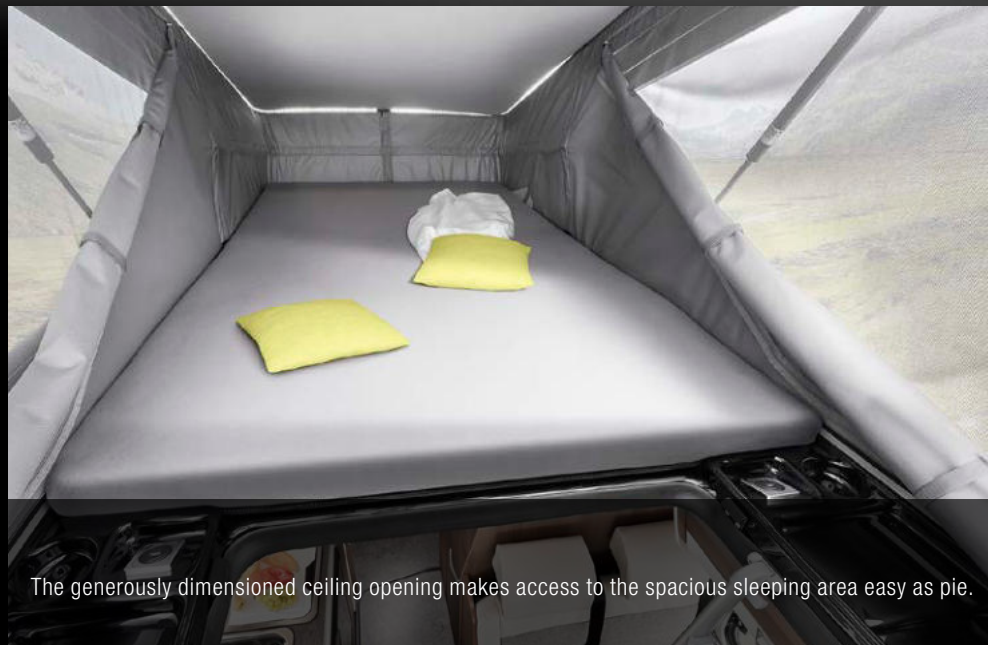

### THE VANTOURER ROOF PACKAGE (OPTION):

- pop-up roof with unique and compact LFI construction, painted in white, incl. roof hatch
- aerodynamic lines for optimised driving behaviour
- aluminium ladder for easy ascent
- warm air outlet in the pop-up roof
- comfort bed with reading lights
- atmospheric RGB ambient lighting
- practical storage compartments with USB charging socket and bottle holder
- cabrio function with mosquito net & blackout
- huge lying surface (200 x 135 cm)

Simply put up the lightweight aluminium ladder and fold up the pop-up roof – your comfortable second bedroom is ready. With a generous height and lying surface, the sleeping area offers everything for a restful sleep.

Two windows, reading lights and RGB ambient lighting always put your relaxing hours in the right light. A warm air outlet ensures optimum air circulation even when the side walls are closed.

For breathtaking moments under the starry sky, you can remove the outer tarpaulin, blackout and mosquito net and enjoy the special view with the convertible function.

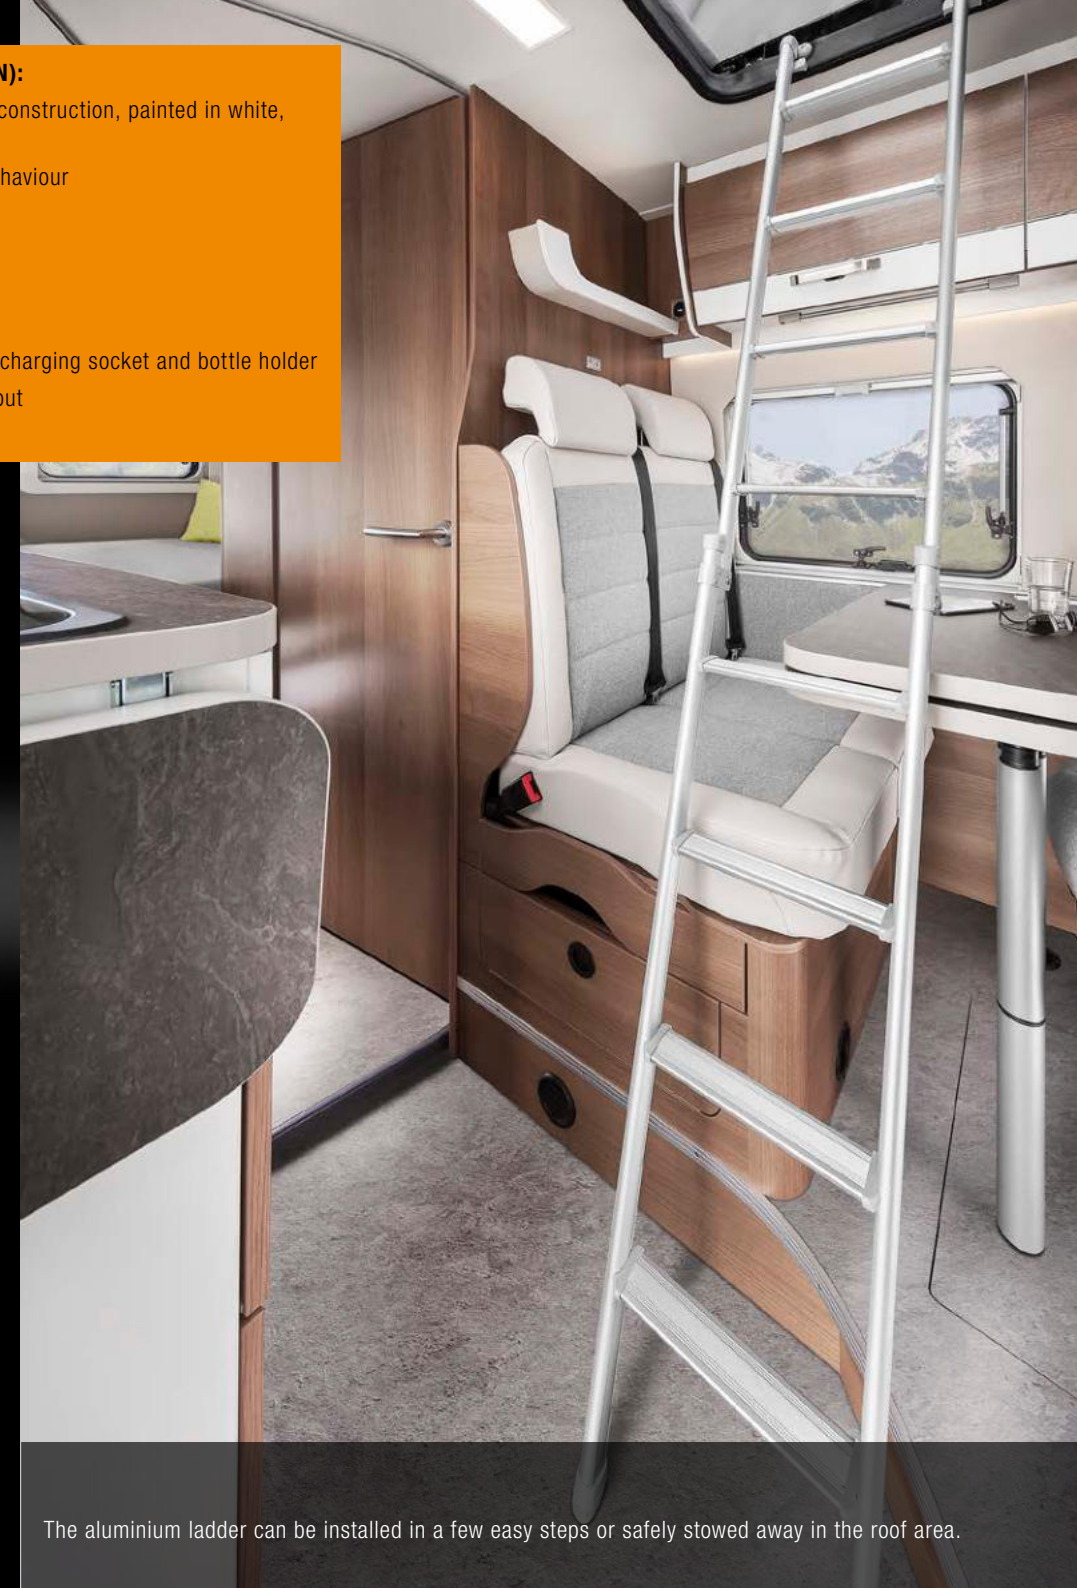

The generously dimensioned ceiling opening makes access to the spacious sleeping area easy as pie.

Next to the roof hatch, there are practical USB socket. On request also with inductive

shelves on both sides, including cup holder and charging tray.

The aluminium ladder can be installed in a few easy steps or safely stowed away in the roof area.

## THE CHOICE IS YOURS

You can choose from a total of 9 colours:

Black metallic

Fer grey metallic

Aluminium grey metallic

Profondo red metallic

Golden white metallic

Campovolo grey

Titian red

Imperial blue

White

You can find more information in the price list.

## A GOOD BASE

All VANTourer models are offered based on the market leader FIAT's vehicles.

### MORE COMFORT\*

Climate-controlled cab | height-adjustable driver and front passenger seats with armrests | high quality artificial leather-fabric combinations | leather steering wheel | leather gear knob | dashboard with chrome-ringed instruments | more windows and skylights to let the daylight flood in Interior | 12V power outlets and extra outlets where you need them | energy-efficient LED lighting | electric entrance steps | more storage compartments for holiday paraphernalia | bevelled wall units for a greater feeling of space | more storage areas and large, swing-out table in the living area ...

### MORE SELECTION\*

Maxi chassis 3.5 t | alloy rims 16" | pop-up roof | winter package | 9-gear automatic transmission | rain and light sensor | heated wastewater tank incl. discharge pipe | 2nd cabin battery | panel windows | Truma iNet box | EVOPORE HRC mattresses incl. WaterGEL overlay | awning | seat heating | fold-down bed | guest bed with foam cushions, bed dimensions 180 x 60 cm | inductive charging tray in the pop-up roof ...

### BETTER SAFETY\*

ABS | ESP | TCS | hill-holder | traction+ (intelligent electronic differential and hill descent control) | LED daytime running light | fly screen door | driver and passenger airbags | isofix child seat belt | VANTourer safety package (emergency brake assist, lane departure warning system with sign recognition, auto dimming, rain and light sensor) | eco package (automatic start-stop) ...

### BETTER QUALITY

Robust furniture construction with sturdy locks and hinges | tough plastic edge bands | high quality, well-insulated, fabric covered walls | full-body furniture construction | cold bridge optimized insulation ...

### BETTER SERVICE

A dealer network with over 60 dealer locations across Europe | certified car repair centres | VIP customer service ...

### LONGER WARRANTIES

2-year manufacturer's warranty, owners of Fiat-based models benefit from Camper Assistance for the first two years

For your comfort, when purchasing a VANTourer, we guarantee the impermeability against moisture of our construction – within the terms and conditions valid at the time of delivery – for 5 years.

\* Some features are optional.

1 Additional warm air vents

2 Wall pocket storage

3 USB connection in the rear and at the seating area

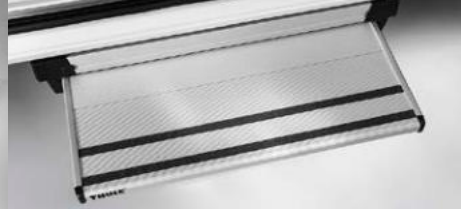

4 Diesel heating in the living area

5 Fresh water tank cleaning hatch

6 LED interior lighting saves electricity

7 Entry step with electronic deployment function

22 Dimmable LED light bar system

21 Fog lights, painted bumpers, LED daytime running lights, lip spoilers

20 Leather steering wheel and gear knob, instrument panel with chrome rings, steering wheel remote control

19 Jack and anti-slip mat in recessed compartment below the table
